

SILTECH

The world's quietest pure tube preamplifier!

www.siltechcables.com

The world's quietest tube preamplifier.

Special long-life tubes guarantee an outstanding sound quality for at least 10000 hours per tube set. All tubes are original new tubes built between 1959 and 1962. The hardwiring is made from direct coupled single mono crystal wires. A new reference is born; This preamp is the most revealing preamp ever built. Not only is it extremely musically involving also the imaging, stereo-depth and resolution are beyond imagination. Hand built in limited series by Siltech specialties group.
