

As cable stabilizers, insulators, replacement weight for "STB-MS", the multi-use carbon pipe with ultimate possibility.

STB-CM

Focusing attention on the acoustic property of the carbon, we at Oyaide Electric have release many audio accessories. Applying those know-how, "STB-CM" was produced as the multi-use carbon pipe which is made of 3mm thick, highly-rigid and lightweight carbon CFRP.

This simple designed pipe works as the replacement weight for the Oyaide original "STB-MS" vinyl stabilizer, the cable stabilizer for line, speaker, and power cable, and the insulator placed under your devices. Furthermore, it has ultimate possibility as the component parts of D.I.Y item. "STB-CM" will become a part of your idea and production.

STB-CM-4
STB-CM-6

Release date : 2010/6/30

- Material : CFRP(Carbon UD + Carbon cloth) ●Dimension : Outer diameter ϕ 20、 Inner Diameter ϕ 14、 H 17 ●Weight : 4 g/piece
- Withstand load : 500kg/piece ●Heat resistance : 120°C ●Package : 4 piece (STB-CM-4)、 6 piece (STB-CM-6)

<FEATURE>

- After Carbon fiber is layered and heat-hardened, it is molded into 3mm thick CFRP pipe. The highly-rigid property of carbon quickly attenuates vibration. It also enhances resolution and S/N ratio due to the electro-magnetic shielding.
- It works as the replacement weights for "STB-MS" vinyl stabilizer.
- It also works as the cable stabilizer and the insulator which can be placed under the devices.
- As the component parts, it can be used for many application. STM-CM give D.I.Yer to the unlimited possibility.

<Application Examples>
