MONO POWER AMPLIFIER

In our search for perfection, for the optimum sound for our speakers, we reached the logical conclusion: the need for our own, technically groundbreaking and musically exceptional power amplifier.

In a joint venture between Leif Olofsson, chief designer of Marten, and audio designer Patrik Boström, we developed a revolutionary new loop linearization technology called AMS (Adaptive Modulation Servo).

AMS is used for the first time in the Marten Mono Power Amplifier which delivers 600 watts in 8-Ohm loads, 1100 watts in 4-Ohm loads, and 1800 watts in 2-Ohm loads. This all makes for a stunningly powerful, yet distortion free, transparent and musical sound.

COLTRANE 2

Remarkable resolution and transparency, coupled with amazing power.

Its newly developed carbon fibre laminate cabinet reduces resonances to close to zero. As versatile as the original Coltrane despite being 40% larger, the Coltrane 2 is extremely powerful, while delivering even better resolution and transparency.

AUDIO BENCH

Perfectly embodying our commitment to form twinned with function, this is an audio bench for true connoisseurs.

The result of a collaboration between Marten and quality furniture manufacturer GAD, the Marten Audio Bench mixes both traditional and high-tech materials such as solid wood and carbon fibre laminate. It reflects our Swedish tradition of form matched with function, combining clean, beautiful design with stunning performance.
